Communication skills	I am a good listener, who succeeds in learning new things. A very sociable colleague who can easily help, skills acquired in volunteering. Due to the intuition and the spirit of observation, I can troubleshoot and overcome most of the problems encountered.

- Personal projects
  - Flight IT is an e-commercial website, used to buy and reserve tickets for a big airplane company. The application aims to create a product that can be expanded into the world market in order to facilitate the search and purchase of a ticket for tourists but also to other potential customers who need to reach different locations in a time shorter. It will provide support on the client side by providing a user-friendly and easy-to-use interface with many functionalities, but will also provide support on the administrative side to the employees of the company, having the ability to monitor in real time all vouchers and flights existing.
  - BookIT is an online booking application designed to help people to find more interesting places to visit and also to find a place where they will can spend some free time.
  - AutoShop is an application which can be easily personalize for new cars dealers to help them to upload more picture and info about their cars.
  - Technologies used:
  - HTML5
  - PHP6+
  - CSS3 + Bootstrap 4
  - JavaScript
  - jQuery
  - JavaScript Frameworks
  - MySQL
  - Splunk to monitore all the flights, tickets, users
- Mobile applications
  - For a website, using the PhoneGap I was able to create an application which could send request using an Ajax call the server and recieve information in the JSON format. Those information was parsed using some JavaScript function and with the HTML and jQuery Mobile it returns all the reservations for the user.

Job-related skills	Technologies used:

- JavaScript
- jQuery
- AngularJS
